Project Design Phase-II Technology Architecture

| Date | 26 October 2022 |
|---|------------------|
| Team ID | PNT2022TMID54033 |
| Project Name Industry-specific intelligent fire management system | |
| Maximum Marks | 4 Marks |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 2

Guidelines:

- 1. Include all the processes (As an application logic / Technology Block)
- 2. Provide infrastructural demarcation (Local / Cloud)
- 3. Indicate external interfaces (third party API's etc.)
- 4. Indicate Data Storage components / services
- 5. Indicate interface to machine learning models (if applicable)

Table-1: Components & Technologies:

| | -1 : Components & | _ | | | |
|------|-----------------------|--|--|--|--|
| S.No | Components | Description | Technology | | |
| 1. | User Interface | Node-RED, MIT app, Web UI | IBM IoT Platform, IBM Node red, IBM Cloud | | |
| 2. | Application Logic1 | Create Ibm Watson IoT platform and create node-red service | Ibm Watson, ibm cloudant service,ibm node-red | | |
| 3. | Application Logic2 | Develop python script to publish and subscribe to IBM IoTPlatform | python | | |
| 4. | Application Logic3 | Build a web application using node-red service | IBM Node-red | | |
| 5. | Database | Data Type, Configurations etc. | MySQL | | |
| 6. | Cloud Database | Database Service on Cloud | IBM DB2, IBM Cloudant | | |
| 7. | File Storage | Developing mobile application to store and receive the sensors information and to react accordingly | Web UI,python | | |
| 8. | External API-1 | Using this IBM fire management API we cantrack the temperature of the incident place and where the fire had been attacked. | IBM fire management API | | |
| 9. | External API-2 | Using this IBM Sensors it detects the fire, gas leaks, temperature and provides the activation of sprinklers to web UI | IBM Sensors | | |

| 10. | Machine Learning Model | Using this we can derive the object recognition model | Object Recognition Model |
|-----|--|---|--------------------------------|
| 11. | Infrastructur e (Server / Cloud) | Application Deployment on Local System / Cloud Cloud Server Configuration | IBM cloudant, IBM IoT Platform |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|--------------------------|--|------------------------------|
| 1 | Open-Source Frameworks | MIT app Inventor | MIT License |
| 2 | Security Implementations | IBM Services | Encryptions, IBM Controls |
| 3 | Scalable Architecture | sensor-IoT Cloud based architecture | cloud computing and Al |
| 4 | Availability | Mobile, laptop, desktop | MIT app |
| 5 | Performance | Detects the Fire, gas leak,temperature | sensors |
